

EXPERIMENT 8

Create storyboards to represent the user flow for a mobile app using Balsamiq

REG NO: 240701324

Name: Mohamed Ismail Fawaz K P

AIM:

The aim is to create storyboards representing the user flow for a mobile Food Delivery app using Balsamiq.

PROCEDURE:

- Tool Used: Balsamiq.
- Created a new project and added mobile screens to represent the food ordering process.
- Designed multiple screens showing each step of the user journey.
- Used components like buttons, text fields, images, and lists from the built-in library.
- Kept the design simple and focused on user flow and interaction.

USER FLOW:

- Homepage – Search and browse food items or restaurants.
- Categories – View food categories like Pizza, Biryani, Drinks.
- Food List – Displays available food items with price and rating.
- Food Details – Shows detailed information with “Add to Cart”.
- Cart – Review selected items and total amount.
- Payment – Choose payment method and confirm order.
- Confirmation – Displays order success message.

SCREEN DESCRIPTION:

- **Homepage**

Includes search bar, offers, and food categories.

Purpose: Entry point to explore food.

- **Categories Screen**

Shows different food categories.

Purpose: Helps users filter food easily.

- **Food List Screen**

Displays list of food items with image, price, and rating.

Purpose: Allows users to browse options.

- **Food Details Screen**

Shows full details of selected item with “Add to Cart”.

Purpose: Helps users decide before ordering.

- **Cart Screen**

Displays selected items and total price.

Purpose: Review order before payment.

- **Payment Screen**

Shows payment options like UPI, Card, COD.

Purpose: Complete the transaction.

- **Order Confirmation Screen**

Displays success message and order details.

Purpose: Confirms order placement.

RESULT:

A storyboard representing the user flow of a food delivery app was successfully created using Balsamiq, covering all steps from browsing to order confirmation.
