

EXPERIMENT 6

Simulate the lifecycle stages for UI design using the RAD model and develop a small interactive interface using Axure RP

REG NO: 240701324

Name: Mohamed Ismail Fawaz K P

AIM

The aim of this experiment is to demonstrate the lifecycle stages of UI design using the Axure RP based on the Rapid Application Development (RAD) model.

PROCEDURE

Phase 1: Requirements Planning

- Identified features from designed screens: Home, Product List, Product Details, Cart, Checkout.
- Defined user actions like browsing, adding to cart, and checkout.
- Prepared basic user flow and requirements.

Phase 2: User Design

- Designed app screens using GIMP.
- Created a new project in Axure RP.
- Recreated wireframes for all screens.
- Added interactions (button clicks, navigation).
- Used reusable components (header/footer) and added annotations.

Phase 3: Construction

- Converted wireframes into an interactive prototype.
- Added navigation and basic dynamic interactions.
- Tested the prototype and improved layout, spacing, and colors.

Phase 4: Cutover

- Finalized and exported the prototype (HTML/Axure Cloud).
- Demonstrated the working interface.
- Provided basic user guidance.

RESULT:

An interactive shopping app prototype was successfully developed using Axure RP
